FILLET WELD TEST

Result	Satisfactory	(Yes/No)
1. The patient is able to perform the exercise correctly.		
2. The patient is able to perform the exercise with the correct posture.		
3. The patient is able to perform the exercise with the correct breathing technique.		
4. The patient is able to perform the exercise with the correct timing.		
5. The patient is able to perform the exercise with the correct intensity.		
6. The patient is able to perform the exercise with the correct frequency.		
7. The patient is able to perform the exercise with the correct duration.		
8. The patient is able to perform the exercise with the correct rest period.		
9. The patient is able to perform the exercise with the correct progression.		
10. The patient is able to perform the exercise with the correct regression.
